Early Childhood

Home Learning (PAUD 2-6 tahun): Alam & Sekitarku

Program Code:

Human beings, including children, have the instinct to get to know the environment. By exploring the natural surroundings, it can improve not only childrens' physical health, but also their self-confidence, creativity, imagination, and their sense of responsibility. Knowing nature can also teach new knowledge and provide new experiences for children. Through this program, Mother and Father can invite their children to get to know their natural surroundings at home through play.

Early Childhood

Home Learning (PAUD 2-6 tahun): Pengguna Jalan yang Baik

Program Code:

The environment outside the home is often considered by parents as a dangerous place for children. In fact, this environment cannot be separated from a child's life! Hmm .. Why don't we just introduce it to the kids?

Through this program, Moms and Dads can introduce young children to various kinds of transportation, traffic signs, and many other things that children can find on the road. Exploration of the environment outside the home from an early age is expected to help children to be more careful and be able to take care of themselves when doing activities on the road.

Early Childhood

Home Learning (PAUD 2-6 tahun): Mengenal Tubuh

Program Code:

From an early age, children have a very high sense of curiosity, especially about themselves. They will explore the shape and the many uses of their body parts. Through this program, Moms and Dads can invite their little ones to play at home to explore the body and its functions. Increasing children's awareness about their own bodies, of course, can make it easier for parents to instill the principles of caring for themselves.
